

**May 2009 - Yarra4 Life welcomes TreeHouse Recycling and Reforestation  
as an ongoing sponsor.**

At Yarra4Life we appreciate working with organisations that view environmental care as paramount. This is especially true for TreeHouse, who actively demonstrate this in their business philosophy, by embracing environmental care as a central component of their operations.

Their core business of secure white paper recycling and document destruction is of itself in the best interests of the planet; and their methods of minimizing their impact on Australia through sustainable business practices including the use of renewable energy sources, such as solar and plant based biodiesel pave the way for others.

Better still, following an initial contribution that will allow Yarra4Life to plant 1500 trees to provide a biodiverse habitat for some of Australia's rarest fauna, including Victoria's animal and bird emblems, Leadbeater's Possum and the Helmeted Honey-Eater respectively, TreeHouse will soon enter into a partnership with Yarra4Life where plantings will take place for every ton of paper processed.

TreeHouse Recycling's support is sorely needed, as both Victorian icons are formally rated as endangered species, with the Helmeted Honey-Eater reduced to less than 120 birds in the wild.

Our ongoing relationship will have multiple benefits for all, including:

- Leading the way in cost effective, environmentally sustainable operations in secure paper recycling, and;
- Providing Yarra4Life with funding which directly delivers on-ground outcomes via biodiverse plantings that support our native flora and fauna and assist in carbon sequestration.

Should you wish to contact TreeHouse Recycling and Reforestation, please refer to their website: <http://www.treehouserecycling.org.au/> or call 03 9419 9522.
