

Compost under vine spreads benefits - FINAL RESULTS

These trials have now been completed and we have measured and analysed 3 years of data.

These **FINAL results** will be presented highlighting the benefits to soil health and recent canopy assessments and winegrape quality.

When & Where:

Friday 28th April 2017

12:30pm - 3:30pm

Balnarring Public Hall

3041 Frankston-Flinders Rd, Balnarring

Afternoon tea provided.

Speakers include:

Declan McDonald

Declan has spent many years conducting compost trials and has a wealth of analytical knowledge on its use and benefits. Declan will present his interpretation of the results over 3 years and discuss best management practices for growers as a result of these trials.
